Quang Hoang

Fairfax, VA | qhoang@wm.edu | (571) 394-0445 | in/quanghoang1 | github.com/theantigone | theantigone.github.io
U.S. Citizen | Active Public Trust | Eagle Scout | Community Service Awards

Summary

AI Software Engineer specializing in **Python**, **AWS infrastructure**, **RAG pipelines**, and **agentic workflows**.

Education

William & Mary Williamsburg, VA
Bachelor of Science in Computer Science | Major GPA: 3.49 *Aug 2022 – Jan 2026*

Experience

AI Engineer Apr 2026 – Present
Lumiture, LLC *Washington, DC*

- Accelerated production deployments by building regression testing pipeline via **LiveKit** and **DeepEval** with 153 tests
- Eliminated session hangs under peak load by debugging asynchronous session failsafe within LiveKit agent worker loop
- Achieved 100% block rate of non-federal inquiries through refactored system prompts and **pytest** regression suites
- Enabled seamless caller transfers across agent queues by deploying phone routing configuration using **Terraform** modules and **Amazon EKS** container deployments

AI Trainer Dec 2025 – Apr 2026
Handshake AI Fellowship *Remote*

- Improved conversational LLM response quality across ~1000 multi-modal evaluations by analyzing output accuracy, clarity, and depth
- Supported prompt development and evaluation tasks by conducting independent research

Agile Software Engineer (Academic Capstone) Aug 2025 – Dec 2025
William & Mary *Williamsburg, VA*

- Delivered 4 sprint milestones for 6-person Agile team by tracking and managing 54 feature tickets in **Jira**
- Maintained codebase quality in **GitHub** across 53 reviewed PRs by adhering to trunk-based workflows
- Automated Qualtrics dataset reconciliation alongside manual data formatting by building a containerized **Django** and **Docker** survey analysis platform
- Secured regression safety for critical data parsing views by writing 33 **Django** unit tests

Software Developer Intern May 2025 – Aug 2025
Soft Tech Consulting *Fairfax, VA*

- Automated internal company knowledge retrieval by deploying LLM chatbot with OneDrive RAG in Copilot Studio
- Streamlined internal contract management by resolving CLIN and task order modifications dependencies by designing relational **Dataverse** schema with **Power Fx** in Teams

Projects

Static Site Generator | *Python, HTML/CSS, CI/CD* May 2025 – Jun 2025

- Automated web deployment into 1-step Markdown-to-HTML build pipeline by building static site generator in **Python**
- Ensured HTML generator stability and parser reliability by writing 100 unit tests via **unittest**

Generative AI & NLP Engineering Portfolio | *PyTorch, Hugging Face, Pandas, OpenAI* Jan 2025 – May 2025

- Automated Python code repair and if-statement completion achieving **0.88 CodeBLEU** score by fine-tuning **CodeT5-Small** model with **Hugging Face Trainer**
- Evaluated LLM code translation and bug fixing across 22 tasks via **BLEU** and **CodeBLEU** metrics by engineering and benchmarking 5 prompting strategies on **GPT-4** and **Codestral** models
- Engineered Java code completion system with low baseline perplexity of ~177 by developing **N-gram Probabilistic Language Model** in Python

Technical Skills

Languages: Python, JavaScript / TypeScript, SQL, C, Java, HTML / CSS, Power Fx
Frameworks: LangChain/LangGraph, DeepEval, LiveKit, Django, Flask, PyTorch, Hugging Face Transformers, pytest, unittest
Developer Tools: Git/GitHub/GitLab, AWS Bedrock, Terraform, FAISS, Docker, Kubernetes, LiveKit, Jira, uv
Libraries: Deepgram, Boto3, Azure OpenAI
